

Anton Savitskiy

+420 773-550-202 • uxuisavitskiy@gmail.com • Prague based

Product designer making financial products feel simple and worth trusting. Seven years in product design, the last three in fintech and crypto — now at Invity (Trezor group), designing Bitcoin investment products under MiCA constraints. Crypto hackathon winner.

Work experience

Invity · SatoshiLabs

Product Designer · Bitcoin investment app, B2C

2024-current

- **Full design ownership** — every flow from research to dev handoff — including the app's complete redesign.
- Design the **investment products**: recurring Bitcoin buys — from simple schedules to strategies with extra capital and adaptive algorithms — and loans, all within MiCA constraints.
- Own the **design system** — tokens, rules, documentation — as the single source of truth for design and engineering.
- Prototype in code with **Claude Code**; contribute design changes to the React Native codebase via git.
- Run **research end to end** — usability tests, interview analysis — and partner with BI on activation and completion metrics.

Trezor · SatoshiLabs

Product Designer · Trading design team, Trezor Suite

2024-2025

Redesigned the **trading form** and **Smart Routing** — the provider-selection layer — alongside other designers, including the design-system designer.

Postmint / Sirio Finance

UX/UI Designer · Web3 affiliate startup, DEX lending protocol

2023-2024

Redesigned **key user flows** and shipped interfaces for new features; presented design solutions to stakeholders and developers.

Applifting

UX/UI Designer · design studio, native apps

2023-2024

Took a data-analytics product from **0 to 1** — core flow logic, branding concepts — alongside smaller client projects; working directly with clients, marketing, and fellow designers.

EMZ Hanauer

UX/UI Designer · B2B web & B2C mobile, waste management

2021 – 2023

Designed the **information dashboard** and its companion app for native iOS and Android; adapted and maintained the **Material Design** system behind them. User research with Maze — interviews, card sorting, tree testing.

Education

University of West Bohemia

Bachelor's degree, Design and Applied Arts.

2014 – 2018

Skills & tools

Design systems

Figma at expert level: variables, component architecture, tokens; Material, iOS, shadcn foundations.

AI-assisted design

Figma Make, Cursor, UX Pilot for ideation; Claude / GPT / Gemini in daily workflow.

Research

Maze, User Interviews, Dovetail; end-to-end from screener to report.

Collaboration

Notion, Jira, Slack; async specs, dev handoff, compliance reviews.
